

SO YOU WANNA BE AN AGENT?

MODULE 7 || DISPUTES

What is A Dispute?

A **contract dispute** occurs when any party involved in the contract is in disagreement regarding any of the terms or definitions contained within the contract.

Contract disputes typically happen when one party **breaches the contract**. In other words, they do not do something that agreed to do in the contract. Which is why I stressed the importance of understanding exactly what you are getting into when signing a contract (in Module 4).
