2) Joe DiGenova dropped a couple of MOABs last night in an interview with Mike Huckabee. Q posted a link to the interview and pointed us to the 11-minute mark.

Listen very carefully to statements made by Joe D.

It's happening.

Q

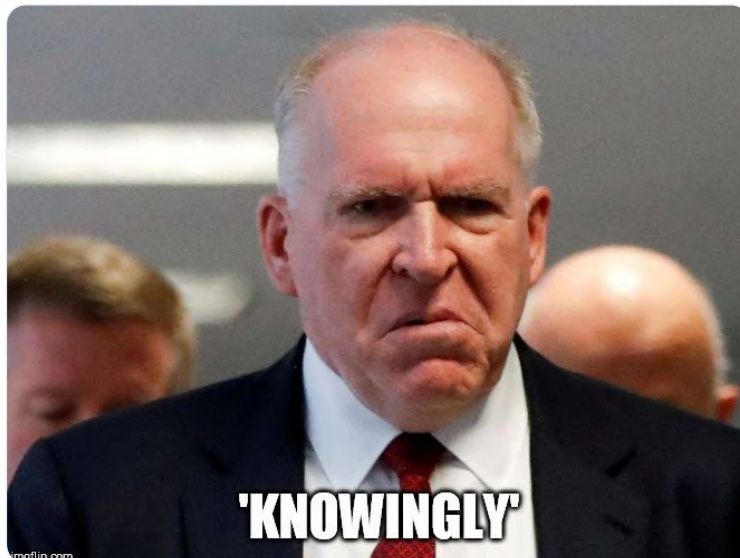

3) Joe DiGenova explains in simple terms that the Obama administration attempted to frame Donald Trump for a crime he didn't commit and that former CI_A chief John Brennan is standing at ground zero.

4) As a former federal prosecutor, DiGenova understands the importance of the word "knowingly." That word distinguishes criminal behavior from carelessness.

5) [[Brennan]]

6) Admiral Mike Rogers acted heroically by determining (at risk to himself) who was illegally using the NSA's database and then taking steps to end their abuse.

7) Admiral Rogers will likely play a key role in the prosecution of corruption.

8) A brief history of abuse of the NSA's database by the deep state is in order.

9) In 2010, Attorney General Eric Holder without an official change of policy or change of law, suddenly decided not to allow the DOJ Inspector General access to the DOJ's National Security Division records. Prior to that time, the DOJ Inspector General had full access.

10) In 2014, DOJ Inspector General Michael Horowitz approached Congress and asked them to pass legislation requiring the DOJ to allow him access to the National Security Division—the branch responsible for managing FISA surveillance.

11) DiGenova said the illegal FISA activity began 4 years ago. That would be 2015.

12) In 2015, then-Deputy Attorney General Sally Yates responded to IG Horowitz with a 58-page letter effectively telling him to buzz off. He was not getting access to the National Security Division and that was that.

13) Horowitz pushed Congress to pass the Inspector General Empowerment Act and ultimately won his battle to get access to the National Security Division but only as Obama was leaving office. It was signed into law on December 16, 2016.

Bypassing the Inspector General – Sally Yates and the DOJ's...

14) Obama's DOJ took extreme steps to avoid the sunlight provided by the oversight of an Inspector General but only in the division responsible for managing FISA surveillance.

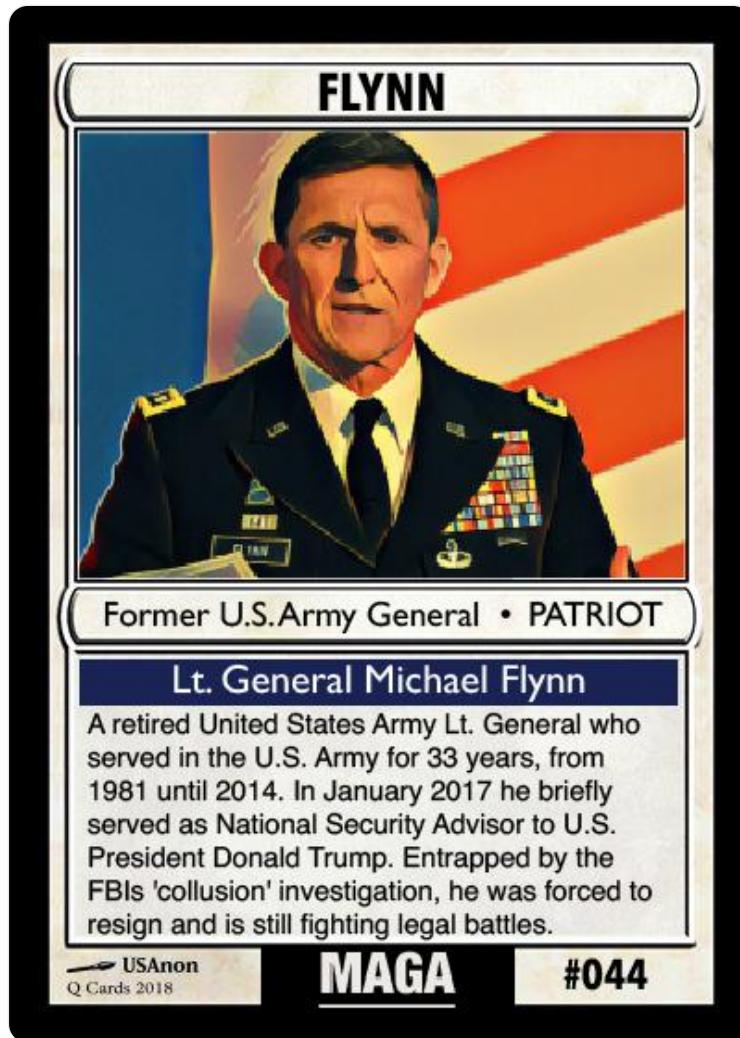

Why?

Did they have something to hide?

15) At this time (2013-2016) the heads of all the intelligence agencies were more or less on board with Obama's plans.

The two exceptions were Admiral Mike Rogers, head of NSA and General Mike Flynn, head of the Defense Intelligence Agency.

16) General Flynn was forced into retirement. Admiral Rogers maintained his position through Obama's Presidency and was the only intelligence department head to be kept on by President Trump.

ROGERS

Director of the NSA • PATRIOT

Admiral Michael S. Rogers

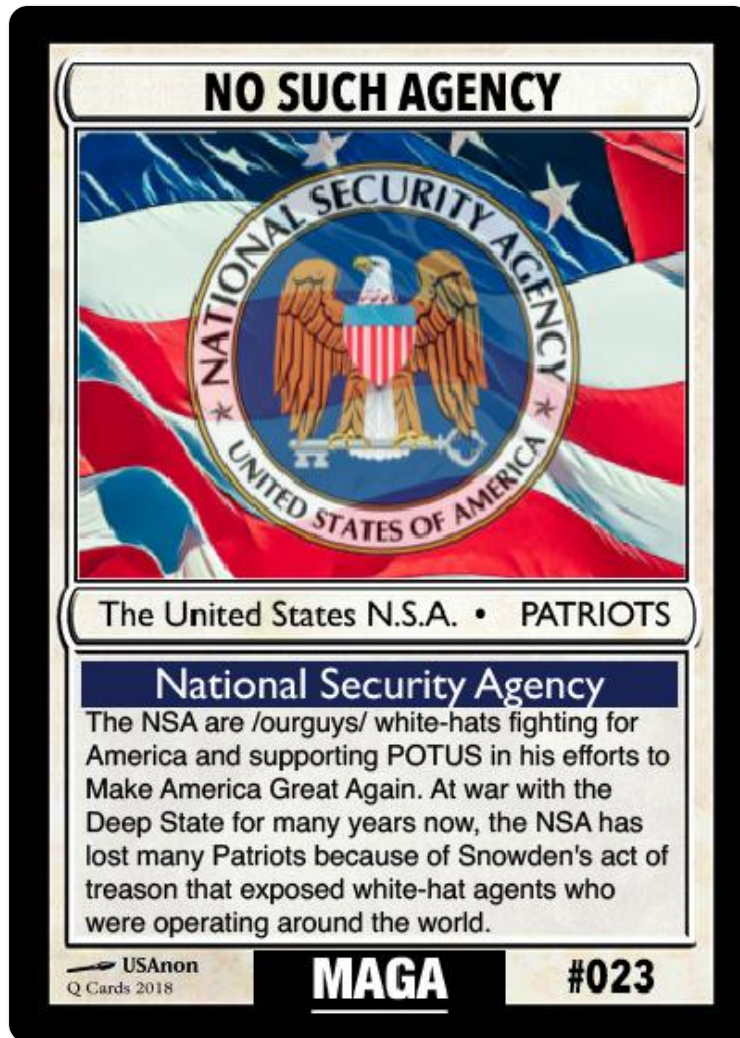

USN Admiral who serves as Director of the NSA, Commander of the U.S. Cyber Command and Chief of the Central Security Service, Head of all 16 Intelligence Agencies, has played a vital role in rooting out this evil. He was in charge of the NSA under Obama and kept his position with Trump, many Anons believe that Adm. Rogers warned Trump about Obama's Intelligence Community spying on him.

17) At the same time that some intelligence agencies were trying to do damage control against allegations of improper use of the government's spying apparatus, one agency seemed to be working covertly to expose illegal activities.

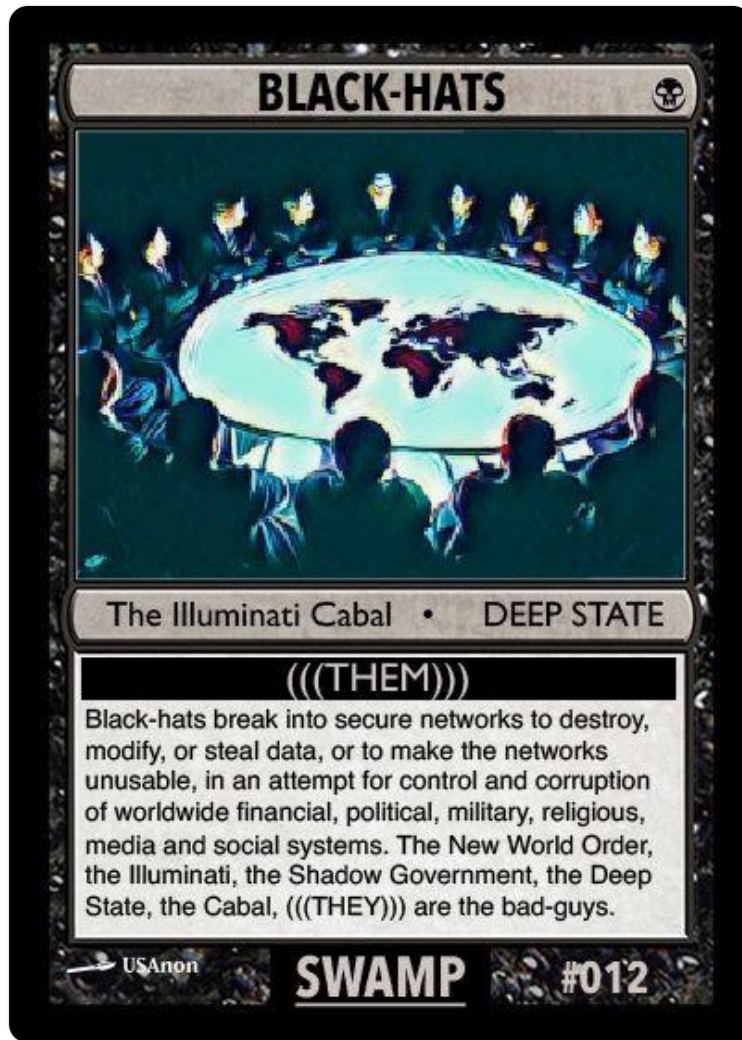

18) Nine days after the 2016 election, Admiral Rogers made a trip to Trump Tower to speak with the President-elect.

Rogers' 2 bosses, Ash Carter and James Clapper demanded Rogers be fired for not telling them about the meeting.

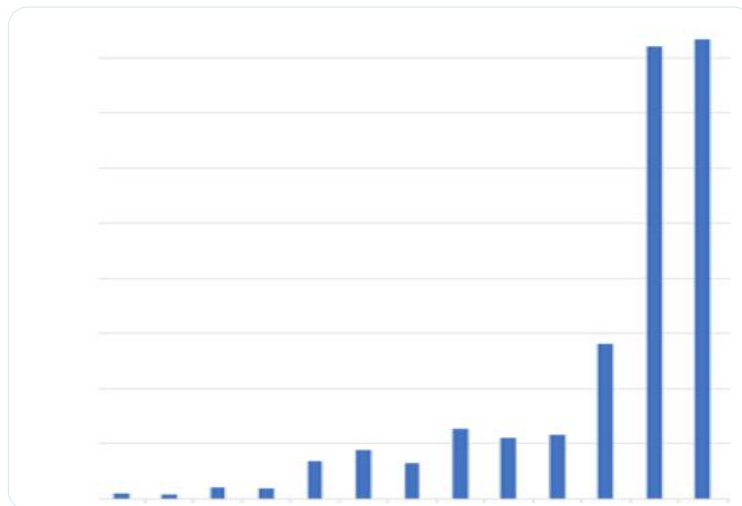

19) The efforts by good people to expose illegality in the Obama intelligence community go far deeper.

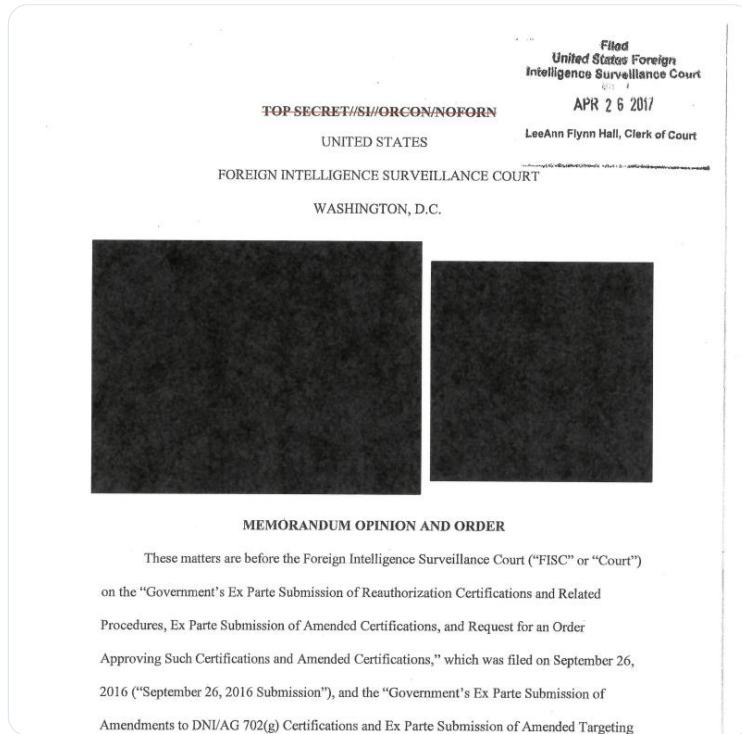

The FBI and DOJ when they need to gather FISA-related intelligence on a target, access a database that is maintained by the NSA.

20) From November 2015, through March 2016, a sharp uptick in queries into the FISA database prompted Admiral Rogers to order an audit.

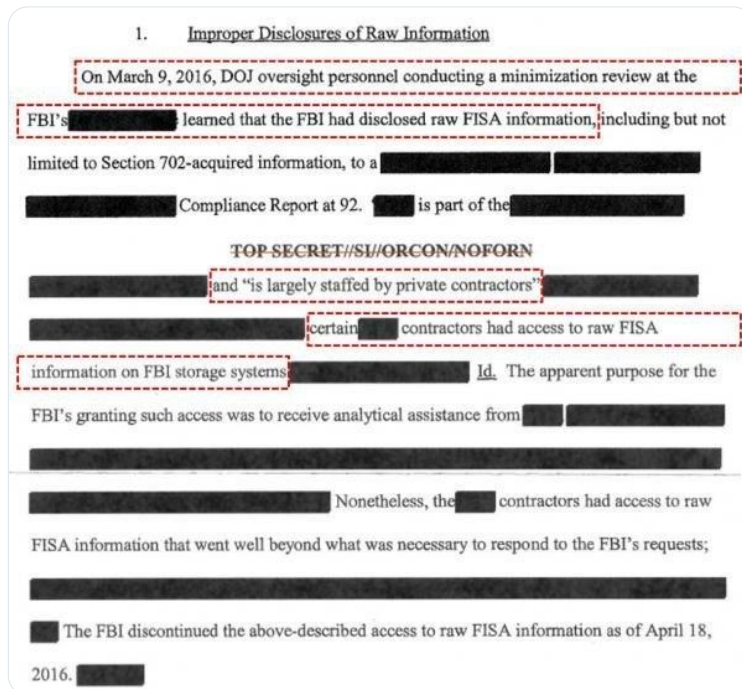

21) The findings of the audit were presented to the Foreign Intelligence Surveillance Court. Judge Collyer produced a 99-page response, which not long afterward was declassified and made public (with redactions).

22) The FBI had allowed contractors to access the database who were not trained in minimization procedures & may not have had a legitimate need for access. (The non-compliance rate was 85%.)

(These are likely to be the 4 contractors DiGenova referred to.)

23) When the abuse of the FISA database by the FBI and their contractors was discovered, Admiral Rogers immediately prohibited further access by contractors and

permanently ended certain types of searches.

24) We don't know with certainty who the contractors were but Fusion GPS and CrowdStrike are the two most likely suspects. Both have a long history of working with the FBI.

This article provides more information.

25) The director of the DOJ National Security Division is required to report irregularities in FISA requests and is required to certify annually FISA compliance. In 2016, John P. Carlin was the head of DOJ National Security Division.

26) In January of 2016, the NSA Inspector General filed a report outlining numerous FISA compliance violations.

27) On September 26, 2016, Carlin filed his annual certifications with the Foreign Intelligence Surveillance Court.

The following day, he announced he was stepping down from his position at DOJ effective October 15th.

Head of Justice National Security Division to step down

Assistant Attorney General John Carlin will step down next month after than seven years, officials said.

<https://www.politico.com/story/2016/09/john-carlin-steps-down-national-security-justice...>

28) I suspect that Carlin knew the jig was up. The illegal surveillance activities were being exposed and if he stuck around, he'd take the fall for it.

29) What purpose would the FBI have for allowing private contractors to access the NSA database?

Simple. If you need information on an opponent, the database has everything you need. And private contractors aren't subject to FOIA requests.

30) Contractors were allowed to obtain information from the NSA database. The contractors gave the information to the FBI. The FBI leaked it to the press to get a story written that they could use to get FISC approval for surveillance on a target.

31) The process is a bit more complicated & involves handing off the information to multiple intermediaries. Each adds information then passes it to someone else. The end game is to manufacture evidence for a FISA application.

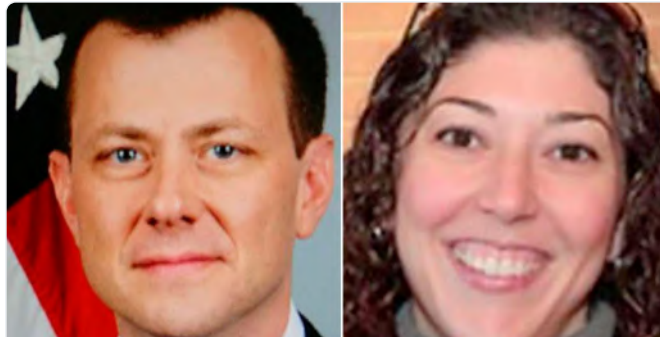

32) On April 18th, 2016, Admiral Rogers ended private contractor access to the FISA database.

On April 19th, Mary Jacoby (wife of Glenn Simpson - the founder of Fusion GPS) paid a visit to the White House.

Why?

33) Did she need to update President Obama and advise him of the new roadblock put in place by Admiral Rogers?

34) I suspect they found a workaround.

Bruce Ohr was # 4 at the DOJ and had access to the FISA database.

He could use his credentials to get access for his wife Nellie Ohr [follow the wives].

35) From May through Sep of 2016 this seems to be how they gathered intelligence.

In May of 2016, Nellie Ohr began using a HAM Radio to try to evade NSA's watchful eye.

[She failed]

36) In October of 2016, Admiral Rogers received the Compliance Officer report showing that FBI gave raw FISA info to a private entity that was not a federal agency and whose personnel were not sufficiently supervised by a federal agency for compliance minimization procedures.

37) The violations pertained to FISA "About" queries. On October 26th, 2016, Admiral Rogers shuts down all FISA "About Queries", and never allowed them to restart again.

38) By October of 2016, the surveillance project was complete. Bruce Ohr met secretly with Glenn Simpson of Fusion GPS. (A meeting that once exposed, cost Ohr his job and his security clearance.)

42) It's interesting that Joe DiGenova mentioned 4 contractors who accessed the FISA database.

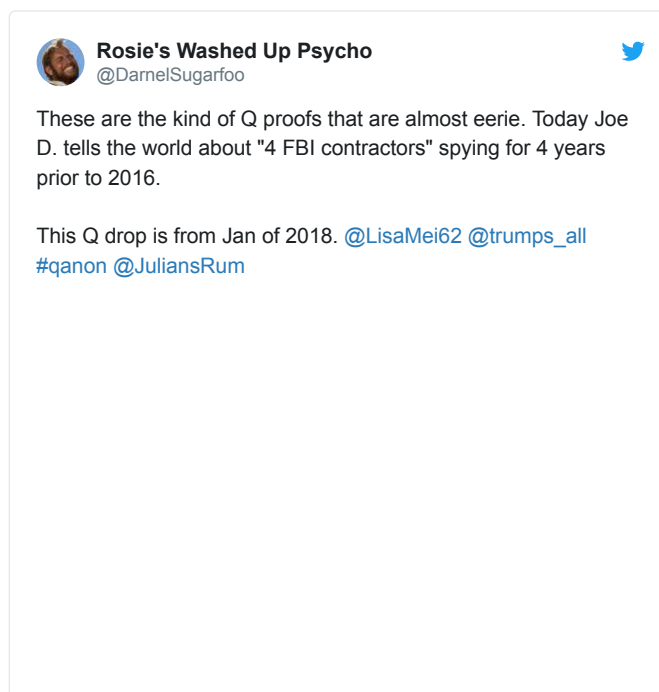

Where they the 4 contractors Q mentioned in January of 2018 who viewed top-secret intelligence in DC without the proper security clearance?
