

Stronger performance, cleaner emissions

Neste MY Renewable Diesel is an entirely sustainable drop-in fuel that increases fuel efficiency, lowers maintenance costs, and reduces your fleet's carbon footprint.

Compared to conventional diesel, Neste MY generates:

- UP TO **80%** less greenhouse gas
- 30%** lower hydrocarbons (HC), which can cause eye and lung irritation
- 24%** lower carbon monoxide (CO), which can increase risk of heart disease
- 9%** lower nitrogen oxides (NOx), which can lead to respiratory issues
- NEAR **0%** polyaromatic hydrocarbons (PAH)

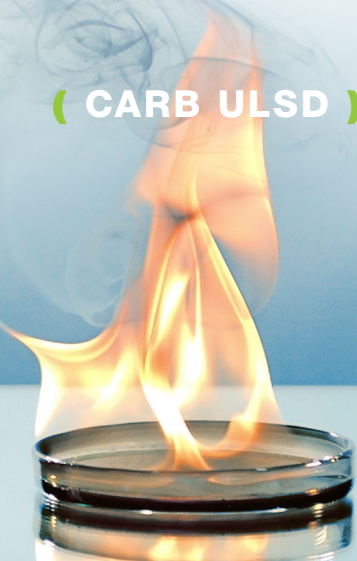

The advantage is clear

Neste MY Renewable Diesel burns cleaner and releases fewer harmful particulates than conventional diesel.

Switching to Neste MY is as easy as shifting gears

Neste MY is fully compatible with all existing diesel infrastructure and meets all regulatory requirements. Plus, it requires absolutely zero vehicle modifications, special maintenance procedures, or additional costs. The result? An effortless switch that promises instant results.

What customers and OEMs are saying:

“We’ve used over 100,000 gallons of Neste MY in over 20 trucks. We’ve experienced an overall increase in fuel economy, less maintenance of our emissions systems, and our drivers have reported gains in power. And we didn’t have to make any additional investments or modifications to our equipment.”

● DAVID B. ATWATER, PRESIDENT, FUEL DELIVERY SERVICES

“Renewable diesel meets the same ASTM D975 standard for petroleum diesel, making it a true ‘drop-in’ fuel. It also requires less maintenance costs than other alternative fuels, and there is no warranty risk for using it to power any Volvo model equipped with a Volvo engine.”

● FRANK BIO, DIRECTOR – SALES DEVELOPMENT, SPECIALTY VEHICLES AND ALTERNATIVE FUELS, VOLVO TRUCKS NORTH AMERICA

“It’s assumed that migrating to renewable diesel will result in infrastructure-related costs or that it will be more expensive. Both of these are misunderstandings.”

● RICHARD BATTERSBY, FLEET MANAGER FOR THE CITY OF OAKLAND

Powerful performance that boosts your bottom line.

4,000-Mile Maintenance Interval Comparison

Neste MY Renewable Diesel™ burns cleaner than conventional diesel, which can help reduce maintenance costs while offering increased vehicle reliability and efficiency.

Superior from ignition to exhaust.

Follow the drop to learn how Neste MY Renewable Diesel outperforms conventional diesel at every stage of its journey.

Neste MY Renewable Diesel is a premium fuel produced from 100% renewable and sustainable raw materials. Cleaner burning and more efficient than conventional diesel, Neste MY Renewable Diesel is setting a new standard when it comes to performance—and the environment.
