

# Freelap Recommendation for Individuals or Small Training Groups

Save \$2000 with this Bluetooth system  
(chips are more expensive  
but you don't need the tripod and relay...  
only the chips, cones, and touch pad.)  
Extra chips are \$250. Two chips will do the job with 7-9 kids.

I have 4 cones instead of 2 ... only use two at a time.

I have 3 touchpads. I could live with one. I use two when doing block starts (speeds up process).

I have 25 Fx Chips. I've functioned with 10 before.

20 chips works great with 40-50 sprinters.

Kids will walk out with Fx Chips and not return them. My advice, have someone designated to collect and count chips every day.
